

Plastic loop

Step 1
Collect and recycle
Mpact Recycling collects over **624,000 tonnes of paper and plastic recycling** from pre- and post-consumer streams. We sort and bale recyclables and put this through our circular value-chain – which operates within a decentralised customer-focused structure. Our Paper and Plastics businesses add value to the recycled materials and other inputs before these are sold for customer and consumer use.

Step 2
Prepare for reuse

MPACT PAPER MILLS
This business unit produces recycled-based packaging paper grades such as containerboard and cartonboard.

65% of recovered paper is used internally

Recovered paper as raw material

35% of recovered paper is sold to external customers

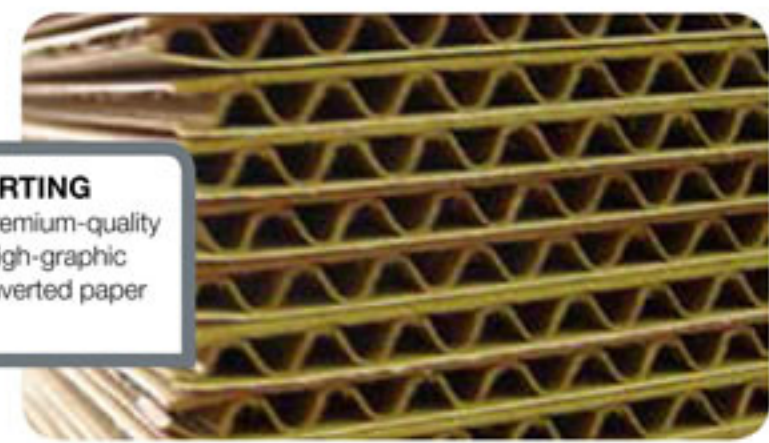

Paper loop

MPACT PLASTICS
This business unit manufactures a range of plastic packaging products that are ready to be used by Mpact's customers.

Step 3
Convert to product

MPACT PAPER CONVERTING
This business unit manufactures premium-quality packaging products, provides high-graphic printing capabilities and other converted paper products.

39% of products sold internally for conversion

61% of products sold to external customers

Plastic packaging products for a range of sectors

Step 4
Customer use

Step 5
Consumer use

Pre-consumer recyclables

Post-consumer recyclables

Pre-consumer recyclables

Post-consumer recyclables

DECENTRALISED CUSTOMER-FOCUSED STRUCTURE
